

LINK-Check™

Paging & Reporting System *improves staff efficiency and peace of mind*

LINK UP TO
1,000
MONITORS

Software is compatible with your existing PC. All fall alarms are displayed on central monitoring station.

With Model Vr, you can eliminate bothersome local alarm and initiate a silent alarm page to caregiver.

LINK-CHECK™
PAGING AND
REPORTING SYSTEM
LETS YOU DO
MORE!

Caregiver can be paged upon all wireless alarms from Classic-Check® or Model Vr.

Facility wide paging

An alarm signal from a Model Vr or a Classic-Check® can be sent to a mobile caregiver's pager.

Alarm event recording

With LINK-Check™ Paging and Reporting System, you will be able to track monitor alarm histories and average response times to alarms.

Custom system configuration

You can customize your LINK-Check™ Paging and Reporting System to identify each monitor with transmitter linked to the system by room number, bed number and/or patient name.

Designed for growth

Pagers and monitors can be added as your needs change. LINK-Check™ Paging and Reporting System can even be upgraded to Arial®, a complete wireless nurse call system.

Monitor status continuously supervised

LINK-Check™ Paging and Reporting System reports the Model Vr and/or Classic-Check® monitor transmitter battery status and if the transmitter should become inoperative.

Redundant paging

LINK-Check™ Paging and Reporting System can be configured to send any Model Vr or Classic-Check® monitor alarm to multiple roaming (not in any specific location in the facility) pagers.

System down alert

If for any reason LINK-Check™ Paging and Reporting System should be shut down, it will send an alert every 2 minutes to all active pagers in its system notifying of its shutdown status.
