

# Why Choose **Bed-Check**<sup>®</sup> Monitoring Systems?

## **Experience**

Fall and restraint reduction monitoring systems have been our main focus since we pioneered the concept in 1978.

## **We meet standards**

ETL certified to meet UL 1069 and CSA 22.2 No. 205R. Our business procedures meet FDA requirements.

## **Durability**

Part of ETL testing requires a 4' drop, 100 times, on concrete, and still function. All our Control Units meet this standard!

## **100% testing**

Fall risks are a safety issue, and reliability is imperative. Every Control Unit is tested before shipment. Every last one.

## **Personal help**

Healthcare professionals in our distribution network throughout the U.S. and Canada will give you personal attention and in-servicing.

## **Tech support and repair service**

24/7 technical support is just an 800 number away. Repair by a factory technician is available.
